

I noticed this type of detail at the eaves.
Does this happen at all the eaves?
Is it a C channel? or Brake Metal?
Galv? Painted?

at 7" wide, this
beam is wider
than the 2x6 wall.

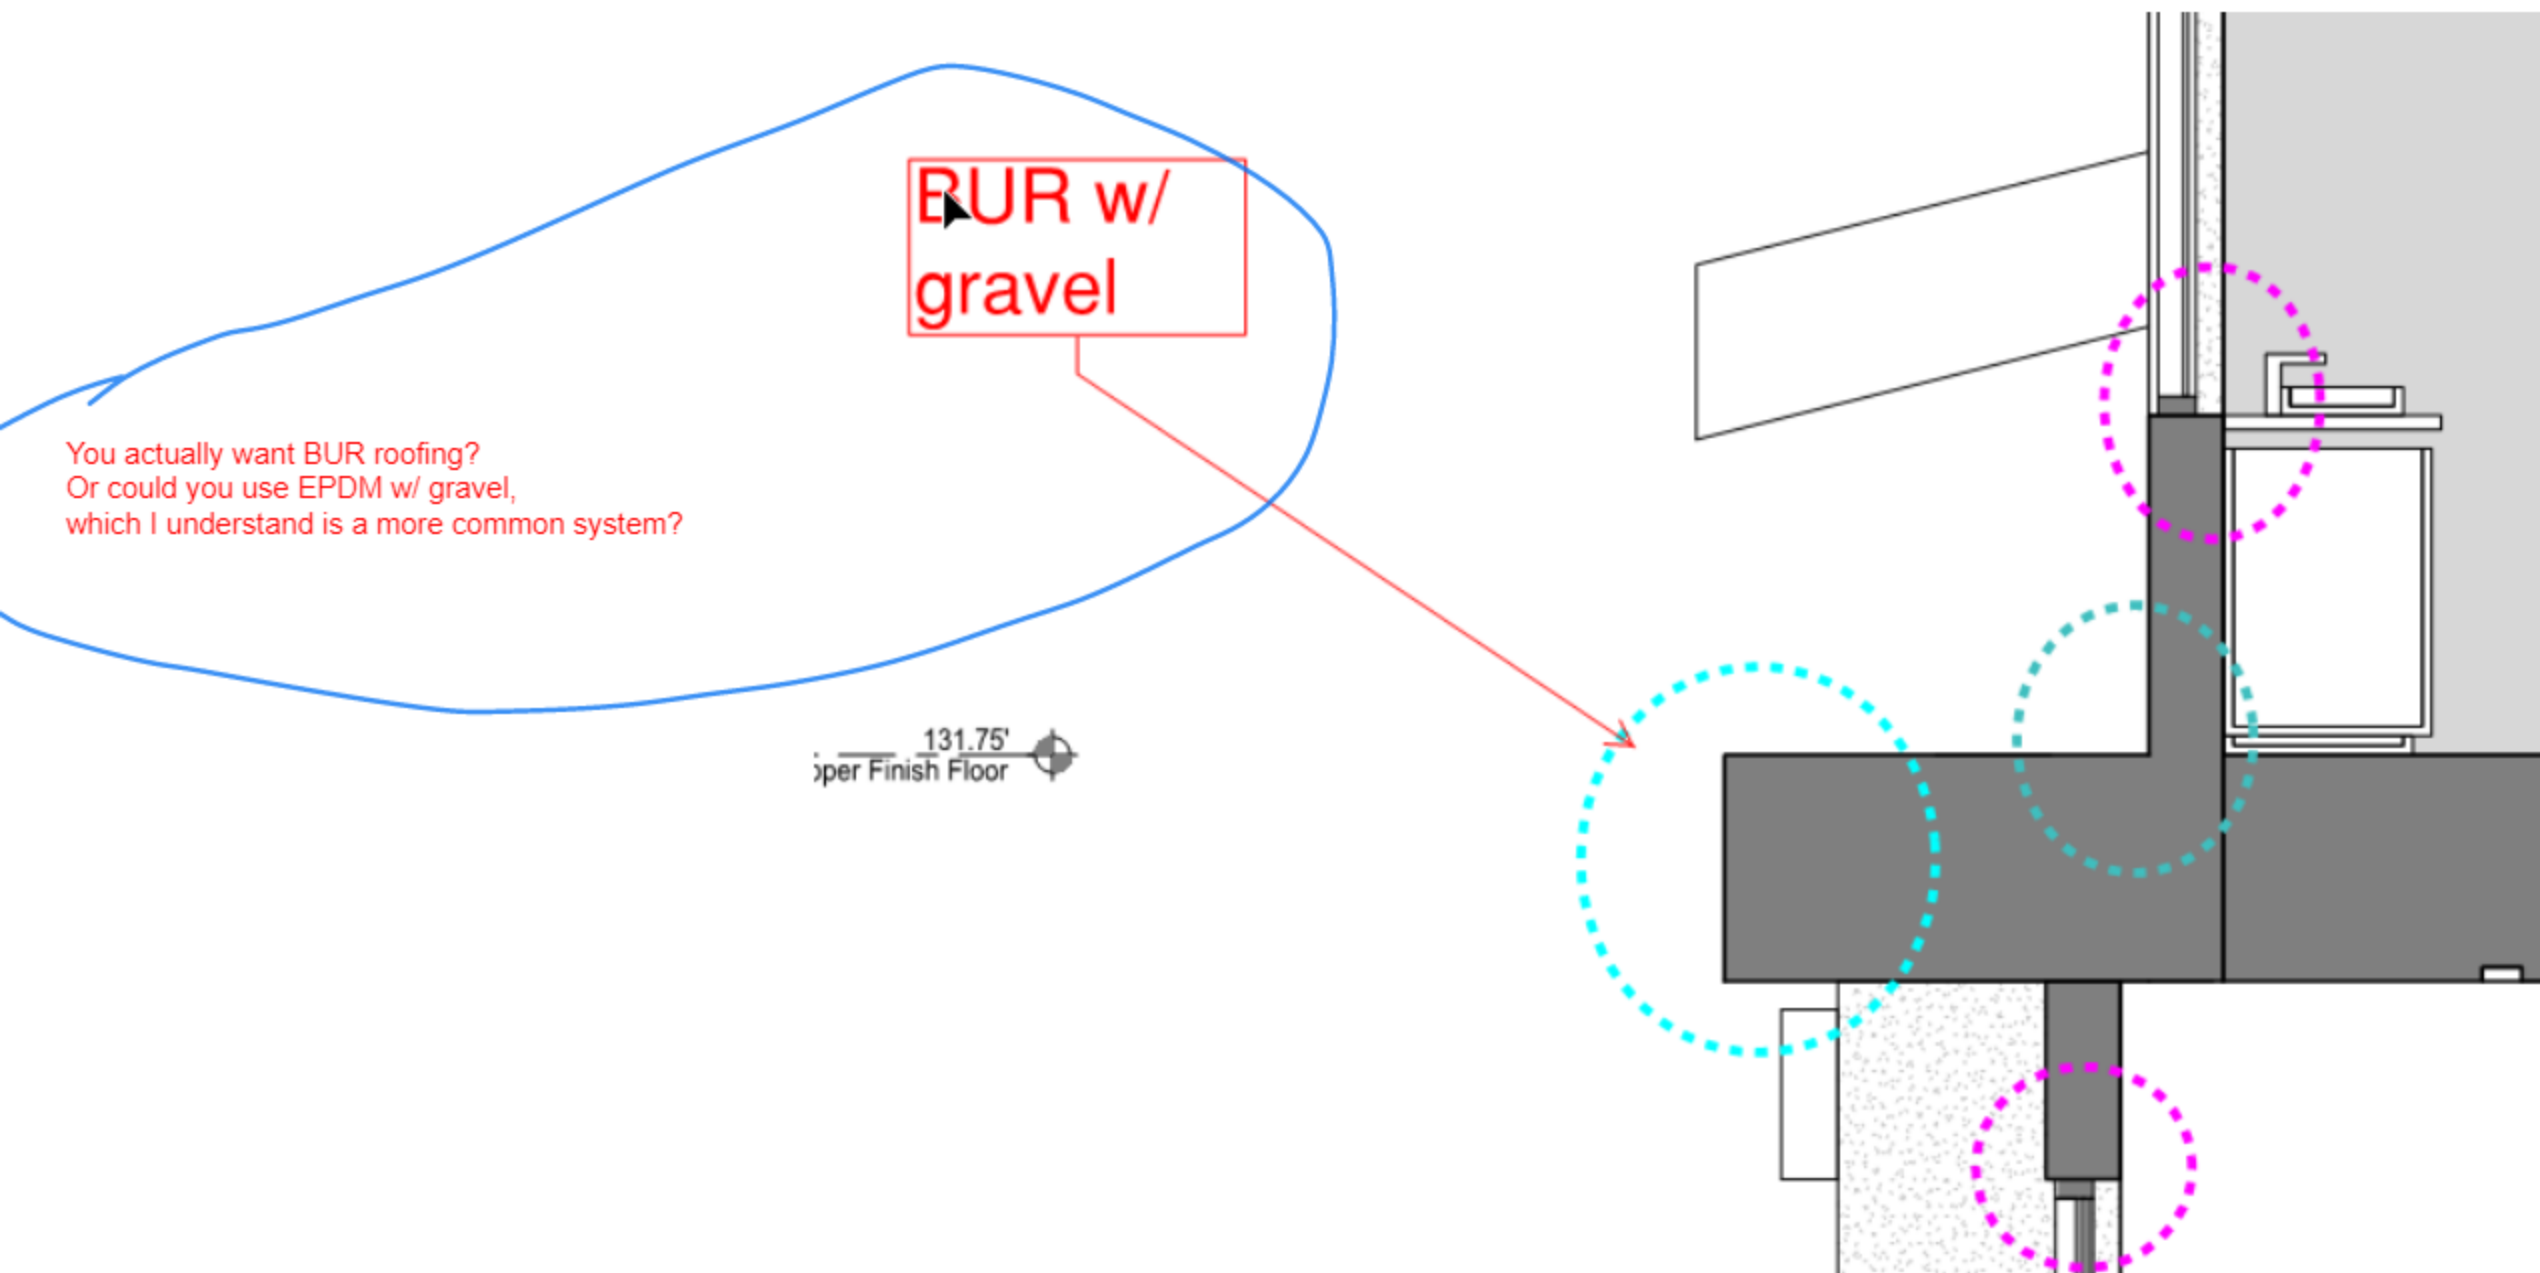

That okay?

Also, Do you want the
top of this
beam to align
with the top of
the floor joists?

Is this
a stucco
ceiling?

Is the following the floor assembly here?

- 3/4" HARDWOOD FLOOR
- 3/4" CDX PLYWOOD
- 14" DEEP TJI
- 5/8" GYP BD?

BUR w/
gravel

You actually want BUR roofing?
Or could you use EPDM w/ gravel,
which I understand is a more common system?
